EXPERIENCE

UiPath - Software Engineer II

April 2019 - Present

React, Styled Components, SCSS, Node, MySQL, MSSQL, Jest

- Developed a tool to handle bulk import of automations in Automation Hub, a platform that connects companies to UiPath's enterprise software
- Led integrations with internal teams to implement new endpoints with unique authentication to publish and access data to and from our platform
- Identified data inconsistencies and resolved them with migrations to sync databases across environments
- Conducted technical interviews for engineering candidates
- Mentored junior engineers and organized 1:1s

IBM - Software Engineer: DevOps

August 2018 - April 2019

Node, React, SCSS

- Deployed enhancements for a web application which facilitates Git repo creation with custom configurations
- Developed scripts to automate build processes and tasks
- Created a monitoring system that detects failure for IBM's offering of Git
- Built and designed front end for a chatbot that helps social workers access resources and answers quickly

The Corcoran Group - Full Stack Engineering Intern

June 2017 - August 2017

Angular, Less, C#, Jasmine

- Collaborated with product and design teams to redesign and modernize key aspects of a real estate listings web application
- Delivered new features and bug fixes, and verified work through unit tests in Jasmine

PROJECTS

The KOVA

thekovanyc.com

- Designed and deployed a responsive website for a restaurant in New York City

Split Calculator

rubydong.me/split

- Coded a web application that can split group expenses which calculates the exact amount an individual spent and accounts for tip and tax

EDUCATION

Stony Brook University

August 2014 - May 2018

Bachelor of Science in Computer Science, GPA: 3.51/4.00
